

# Enhanced quality

Using the technology Noritsu has developed over the years as a leader in silver halide printing, the QSS Green II delivers a level of quality that exceeds all expectations.

## High quality & High resolution

### Beautiful sharp prints with multiple dot gradation dye ink system

The QSS Green II uses a high-grade dye ink system that accurately portrays fine details due to its multiple dot gradation technology. The high quality ink, combined with the excellent absorbing quality of the paper, enables the QSS Green II to produce outstanding print quality.

### High grade ink that produces long lasting colors

Prints made with conventional dye ink tend to fade quickly. However, the ink used in the QSS Green II has an improved molecular structure so it is able to withstand light and ozone. This is why QSS Green II prints boast excellent lightfastness and long lasting colors.

**Molecular structure of convention dye ink**  
Parts of the molecular structure are weak. Results in deterioration and fading.

**Molecular structure of QSS Green II dye ink**  
The dye ink used in the QSS Green II has been improved to withstand deterioration, ensuring your prints will be enjoyed for generations to come.

## Raw file printing

### High quality prints from raw image files

Adobe's DNG conversion technology is incorporated into the EZ Controller along with Noritsu's AccuSmart image processing technology. This means you can easily make high quality prints from raw image files without using separate raw file conversion software.

## Optimize the image with EZ Controller

### EZ Controller (Sold separately)

In addition to serving the important role of system operation software, EZ Controller also has a wealth of advanced image correction functions to correct sharpness, contrast, noise, backlight, red-eye, and under/over exposure, etc.

## Two profiles to choose from

There are two profiles available as a standard feature for the QSS Green II – One that emulates the look of silver halide prints, and one that uses the full inkjet gamut to produce more vivid colors. The profile can be easily changed anytime to meet individual needs.

Silver halide profile

Inkjet profile

## The QSS Green II can make impressive 1440x1440 dpi high-resolution prints

1440x1440dpi high resolution prints are less grainy and have smoother gradations than standard prints. Furthermore, this improvement in terms of graininess also has the effect of producing a better portrayal of contrast, texture and depth.

720x720 dpi

1440x1440 dpi

You can register different resolutions (the standard 720x720dpi or the high resolution (1440x1440) in different print channels in the EZ Controller. This enables you to easily change the resolution by simply changing print channels.

### JPEG data

A large portion of the pixel data in the original JPEG image has highlight areas that are too light. When the image is corrected, the overall light in the image is reduced, but the pixels representing the highlight areas that were too light are unsalvageable.

### Raw data

All gradations are used, producing an image that is balanced well. There are very few pixels with shadows that are too dark and highlights that are too light.

Specifications							
Printing system	Piezoelectric inkjet system						
Print resolution	720x720dpi 6 gradations per dot (5 dot sizes + no dot (White)) / 1440x1440dpi 4 gradations per dot (3 dot sizes + no dot (White))

## A new page in the QSS story

# Enhanced value

With the QSS Green II's wide variety of print services, you can provide new ways for people to enjoy their photos.

## Paper Advantage

### A wide variety of paper

With more paper to choose from, the QSS Green II increases the range of value-added products you can offer. Single-sided prints, duplex prints, photo books and many other unique value-added products are all possible with this versatile minilab.

#### Metallic prints

Metallic/Pearlescent prints

#### Sticker prints

Poster, POP etc.

#### Duplex prints

Photo books

Greeting cards

Photo calendars

Business cards

Photo Studio

\*1 Supports paper with thicknesses in the range of 222 to 288 (0.222 to 0.288mm)  
\*2 Print quality and/or mechanical failure related to the use of non-Genuine Noritsu Paper may not be covered by Noritsu warranty and /or your local dealer service program/s.

## Print Size Advantage

### Enlargements / Panoramas

The QSS Green II can make enlargements in sizes of 10"x 12", 12"x 18", and many other sizes, including panorama prints all the way up to 12"x 36". This enables you to provide personalized photo products such as poster prints, locker prints, and just about any custom print size you can think of.

#### Maximum print size

Roll Paper  
**305 × 914mm**  
**(12" × 36")**

Sheet Paper  
**330 × 635mm**  
**(13" × 25")**

Prints made on sheet paper that exceeds 305mm (12") in width will have borders on both sides in the width direction.

305mm (12")

914mm (36")

305 × 457mm (12" × 18")

Panorama print

# Enhanced productivity

With its high capacity and labor-saving features, the QSS Green II has what photo retailers need.

## High Performance

### High capacity enabling a steady turnover

Print capacity is the key to maintaining smooth and steady profits. The QSS Green II enables you to quickly fulfill urgent orders of any size without sacrificing its top-level print quality.

**6" x 4"**  
(152 × 102mm) approx. **950** prints/hour

**10" x 8"**  
(254 × 203mm) approx. **305** prints/hour

**12" x 10"**  
(305 × 254mm) approx. **223** prints/hour

When outputting at 720 × 720dpi

### Use less space to sell more with this compact minilab

The QSS Green II can be installed against the wall in 2 directions and its space-saving design makes it easy to install anywhere. Maximum sales from minimum floor space. That's what the QSS Green II is about.

Footprint **0.69m<sup>2</sup> (7.43sq.feet)**

## Roll Paper

### Dual magazine system supporting a countless variety of print sizes

This dual magazine system, which is the first in the industry to support 2-lane magazines, enables you to load up to 4 paper rolls (Widths: 89 to 152mm / 3.5" to 6") and provide a seemingly infinite variety of print sizes.

Paper rolls with different paper widths

Paper rolls with different paper surfaces

## Sheet Paper

### Supports sheet paper as well as roll paper

The QSS Green II can produce prints from both roll paper and sheet paper. Sheet paper gives you the ability to produce high quality duplex prints, which open the door to a whole new realm of exciting value-added print possibilities.

## Automatic Order Sorting

### Two print sorters to choose from

You can choose the 4-order print sorter or the 12-order print sorter.

### LED lights to signify interrupted orders

The EZ Controller Software has always had the unique ability to interrupt orders in process to give preference to urgent orders. Now, with the 12-order print sorter, LED lights are used to signify which tray has the urgent order and which trays have the order that has been interrupted.

## Economical / Eco-Friendly

### Easy to use, easy on your wallet, and easy on the environment

There are no photofinishing chemicals involved with dry systems. This brings you a reduction in time and costs because you do not have to worry about maintaining specified temperatures, handling and disposing solution, or any other related troublesome tasks. With the exception of paper, the only consumable replacement needed for this environmentally-friendly minilab is the ink cartridge. This function can easily be done by anyone.

Easy ink cartridge replacement

### Energy-efficient

The QSS Green II can help you cut your electricity bill drastically. It is estimated to use only about 1/3 to 1/5 the amount of electricity that silver halide minilabs use. This reduction in power consumption makes it both economically-friendly and ecologically-friendly.

Silver halide minilabs

QSS Green II  
Approx. **1/3 to 1/5**

\*Compared to Noritsu silver halide minilabs. Exact amount varies depending on the model.
